Personal Profile

I am an experienced web developer with a strong track record in supporting clients by promptly addressing website queries and creating custom functionality using HTML, CSS, and JavaScript. Currently working at a web design agency, I have also gained valuable experience collaborating on projects in a team. I am passionate about all areas of web development and am constantly seeking to expand my knowledge.

Key Skills and Achievements

- Significantly improved the performance of a WooCommerce website by 135%.
- Resolved over 3000 tickets in a timely manner in 2022.
- Contributed to an internal React/Node system by building a website uptime monitor.
- Implemented responsive website edits to enhance mobile usability.
- Performed substantial revisions to a website using HTML and CSS.
- Developed a Node.js script to extract product data from a website into CSV format.
- Contributed to open source projects, specifically Laravel and MDN.

- Meet high standards of display and visual merchandising to ensure the store is well presented.

Interests

In addition to my professional pursuits, I maintain a number of hobbies and interests. Physical fitness is important to me, so I regularly go to the gym. I also have a strong interest in combat sports, especially Boxing and MMA, which I follow closely. In my free time, I enjoy solving the Rubik's cube - which I can solve in less than 20 seconds. To stay updated with the latest trends and advancements in the industry, I code in my spare time and create personal projects to learn new languages, tooling and technologies. I enjoy reading books and am currently immersed in "Atomic Habits" by James Clear.
